

Variable Rate Prescription

Use historical yield data to generate management zones and validate rates using veriblocks.

About Us

Our team of certified crop advisors are highly skilled and experienced at the art and science of prescription writing. From initial consultation to implementation we have programs that fit any need. We are passionate about taking care of your farms in a scientific manner using proven techniques that are simple to use.

How It Works

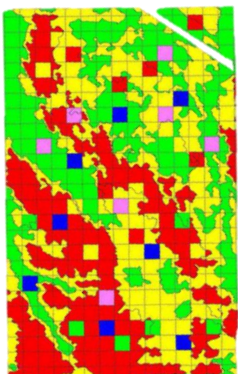

Our team of CCA's will setup a consultation with you to learn about your farm goals. We will assist you in managing your farm data, and help you determine your best steps moving forward. We will collaborate with you to design management zones, and assign rates based on your specific products.

Solutions R_x

Powered By

1. Individual Field Prescription [\$4/ac]
 - includes script writing from supplied data layers
 - Veriblock validation
 - Single pass application
2. Individual Field Unlimited Prescription [\$5.50/ac]
