MS T&T CLEANER

A STRONG, POWERFUL AND VERSATILE CLEANER

MS Schippers

MS T&T CLEANER

MS T&T Cleaner is a powerful and safe cleaning agent for the cleaning of any type of transport (cars, trucks, combines, tractors, trailers, etc.) and lacquered surfaces. You may have heard of this product via our Twitter, Facebook or Instagram. Subscribe to and like our pages for more information!

MS Schippers is the creator and manufacturer of this extraordinary product and it is sold throughout the world.

BENEFITS:

- Removes pollution perfectly even at low concentrations
- Good adhesion, so pollution and road dust will be removed after one application, if this product is used correctly
- Suitable for cleaning vehicles, boats, floors, trailers, RV's, vinyl siding, tractors and machines
- Perfect streak free cleaning
- Biodegradable
- Available in 22 kg and 230 kg (230 kg only available in Canada)

USER GUIDE:

Step 1

No need to pre-rinse
Apply the foam bottom up

Step 2

Wait 3-5 minutes

Step 3

Rinse from the bottom up

Step 4

No need to wax, as it is built
into the T&T Cleaner

- Put undiluted T&T Cleaner into the Foam Gun Tank (an inch at the bottom will do a pickup truck, the full 2L canister will do a semi tractor and two trailers), use cold water to apply the foam, and avoid washing in direct sunlight or on hot days. (Optimal washing temperature is between 15°C and 25°C/60°F and 75°F). You will attach the foam canister directly to either your pressure washer wand or the pressure washer nozzle, depending on if you are using our quick connect system or not. **You should avoid using T&T on Aluminum that has been polished in the last 6 months.** After 6 months, make sure to pre rinse polished aluminum surfaces prior to cleaning.
- There is a dial on the side of the canister, this indicates the % of product being used. Typically we have it set at 2%- 4%. The % of product may vary in your area but the biggest indicator that you are running at the correct % will be the consistency of the foam (should be thick like shaving cream), so adjust this dial until you get the correct foam consistency.
- Spray a thin even layer (if applied too thick, the foam will run) and apply the foam from the bottom up. Leave the product on for 3-5 minutes (do not let the product dry on, wash in stages if necessary). When you are ready to rinse, again start from the bottom up. The reason for this is so that you can see where you have rinsed with the pressure washer. If you start from the top all the water will run down the vehicle and you won't be able to see where you have rinsed. You can rinse the product off with hot water, but it is not necessary.

FOAM KITS

Cleaning products only work when applied correctly. That is where our coupling kit and our foam gun come in. We assure the best layer of foam when using our kits, and of course, the best results! Who doesn't love a clean vehicle!?

FOAM KIT A

- Foam gun LS10, 2 liter tank
- 1/4 Plug male thread
- Drain tap 61 mm

FOAM KIT B

- Foam gun LS10, 2 liter tank
- Quick connector Kew/Alto Profi 1/4"
- 2x Coupling Kew/Alto
- Adapter 2x 1/4" male thread
- Teflon Tape
- Drain tap 61 mm

FOAM KIT C

- Foam gun LS10, 2 liter tank
- Quick connector Kew/Alto Profi 1/4"
- 2x Coupling Kew/Alto, 1/4" female thread
- Adapter 2x 1/4" male thread
- Teflon Tape
- Drain tap 61 mm
- High pressure gun ST 2600
- High pressure spray lance 15°, 120 cm
- Quick Coupler 1/4" Female thread
- Plug 3/8" Male thread
- Adapter Kärcher, 3/8" male thread

The Wash bay set up that you see below is the optimal way of using our T&T Cleaner. You're never in direct contact with T&T and you always have the right pressure and dilution of the product, eliminating any waste.

SAFE TO USE:
NO CONTACT WITH
PRODUCTS

MS GREENLINE WALL MOUNTING

The MS Greenline 2.0 is a tool for cleaning and disinfecting stables and transport vehicles. Foaming and disinfecting can be done in one act, when connected to a high pressure system.

- Always the right concentration of the right product
- Safe in use: no contact with products
- Connect to existing high pressure systems
- Cost reduction possible by using our greenline plan
- In one quick motion, it is possible to switch from rinsing to foaming or disinfecting
- Made of hygienic stainless steel
- Space for 2 jugs of ± 30 kg

OTHER PRODUCTS

These products are also available at Schippers Canada Ltd. Contact us for more information.

MS MEGADES NOVO

MS Megades Novo is a very powerful disinfecting product for use in animal housing and animal transport vehicles. It's powerful foaming action penetrates deep into porous surfaces.

- Extremely good adhesion
- Broad ranging efficacy against bacteria, yeasts and viruses
- Very user-friendly

A germ free living environment is of great importance to your animals' health. The animals, their housing, and materials should all be clean. Effective decontamination is only possible after proper pre-cleaning. You can expect significant reduction in pathogen pressure if you use the proper method of application.

Pathogen pressure on vehicles

Immediately after emptying	After pressure washing	After cleaning	After disinfection
50,000,000 pathogens/cm ²	20,000,000 pathogens/cm ²	100,000 pathogens/cm ²	<500 pathogens/cm ²
Immediately after emptying	Spray clean with cold water	Spray clean with MS T&T Cleaner	Disinfect with MS Megades Novo

FLOORCOATING

The MSE Floorequal coat is a unique, high quality, two-component, self equalizing, epoxy coating, with very high mechanical and chemical durability properties. This durable and high quality product has many application possibilities in the intensive livestock farming sector. It is often used in feeding troughs, cattle farming, remediation (meat) poultry houses, garages / workshops or as a bottom layer in combination with other coating layers.

PUROFORT THERMOPLUS BOOTS

Boots for all-round use in the agricultural sector. Specially for wet, dirty and slippery conditions.

Available in the sizes 6 to 13,5.

- Heavily insulated (down to -50)
- Made of polyurethane
- Fitted with steel toe cap and sole
- Resistant to oil and grease
- Resistant to alkali and acid
- Outstanding comfort

MS POWERCLEAN COVERALL

Spraying suit for all-around use in wet conditions.

Available in sizes S to 4XL.

- Special one-piece spraying suit made of polyester fabric with vinyl
- Specially developed for cleaning livestock buildings, or for all kinds of outdoor activities
- Conforms to EN340 and EN343 (class 3) standards

DO'S & DON'TS

Follow the guidelines below for best results. MS T&T Cleaner is a biodegradable product, making it safe for a variety of applications including trucks, tractors, boats, combines and more!

DO

- Use 100% concentration.
- Use cold water to apply foam.
- Set your foam gun dial between 2 and 4 for best results in application.
- Apply an even, thin layer of foam. When application is too thick, the foam will run.
- Allow foam to soak for about 5 minutes.
- Wash from the bottom up to ensure maximum removal of dirt and grime.
- Clean a small test spot on new surfaces.
- After each use, run clean water through your Foam Gun for 15 - 30 seconds.

DON'T

- Don't wash in direct sunlight or on hot days. Optimal washing temperature is between 15°C and 25°C/60°F and 75°F.
- Don't foam freshly polished aluminum without pre-rinsing. Use caution when washing polished surfaces.
- Don't allow soap to dry on vehicles and equipment. Wash in stages if this is a concern.
- Don't store below 5 Celsius

PRESSURE WASHER REQUIREMENTS

- Minimum: 1100 psi
- Ideal: 1500 psi
- Maximum: 3000 psi; 6 US gallons per minute or 22 L per minute (If higher, contact your local dealer or Schippers Canada for guidance.)
